

# ILL STARRED CAPTAIN

Press release May 2016

Ill Starred Captain had an exceptionally busy 2015, playing numerous live shows and travelling thousands of kilometres across the country. Over the fifteen years the band has existed they have proven themselves to be one of Australia's more resilient and creative bands. Comprised of singer/songwriter/guitarist Scott Bassham and drummer Justin Francis the duo kick a brand of folk/punk/surfadelic sound that leaves crowds in awe that they are only a two piece outfit. Ill Starred Captain have placed great value in developing their own musical and creative pathway, self reliance and a dedicated work ethic that has allowed them to survive and prosper during dramatic changes within the music industry.

Ill Starred Captain are currently recording their fifth album with Dave Lokan at Big Sound studios in Adelaide as they have done for all titles released on their Seawitch Music Label. The band still thrives in the live environment providing an energy charged and highly memorable performance. It is with great pleasure that we see them perform in Melbourne and throughout South Australian regions in May. Head on down to these shows and witness a band that truly demonstrates what it means to be alive and well within the Australian recording business. <http://www.illstarredcaptain.com>
